Amazon Ember
Regular size 42 and
line height 1.4. You
can read it but it
might be too much.
Here you have 120
characters

4

Logo

This sentence is Amazon Ember Regular font size 42 and line height 1.4. I have also left a 40dp padding on each side so edges are not too close. The text is easy to read from around 3 meters for most users and we can have more detail than with Echo Spot. In this text there is a total of 303 characters.

And a small text

SCREEN 1

Try saying Pasta

This sentence is Amazon Ember Regular font size 42 and line height 1.4. I have also left more margin than for Echo Show 5: 60dp padding on each side to improve the reading from further distances. The text is easy to read for most users and we can have more detail than with Echo Spot and Echo Show 5. It is not that common to have texts this long though. In this text there is a total of 403 characters.

And a small text

SCREEN 1

Try saying Pasta

This sentence is Amazon Ember Regular font size 48 and line height 1.4. I have increased the margins again going up to 90dp on each side. Thanks to that the text can be read from further. Most users will find it easy to read and there is still room for longer texts than, in Echo Spot, Show 5 and Show first generation. Again it is not normal to have texts this long. In this text you will find no more no less than 430 characters.
